Subject: Full environmental impact statement needed for Gardner/ Edgerton Intermodal Truck Fail Depot!
Date: Saturday, August 08, 2009 8:53:47 PM

Regulatory Project Mgr. Joshua Marx
U. S. Army Corps of Engineers
Kansas City Regulatory Office
Kansas City, MO

Dear Project Manager Marx:

As a citizen of Douglas County who will also be affected by the diesel smoke, the noise and the truck traffic increase to our County, as a result of the intermodal truck/rail depot in Gardner/Edgerton --AND the concomitant logistics park to be built as well, and in awareness of the Gardner City Council's rejection of the use of their storm drain system and treatment plant to handle water pollution --as well as the increased air and noise pollution and traffic congestion to City and County residents of Miami, Johnson,Franklin, Wyandotte, Kansas City, MO and our Douglas County, I URGE that a FULL Environmental Impact Statement be required --since federal funds are to be used.

WITHOUT ADEQUATE, INDEPENDENT, SCIENTIFIC STUDY AND DOCUMENTATION of the environmental impact to the water, air, and traffic/noise pollution to the counties and citizens most affected, irrevocable damage could be done to the quality of life in our area.

SLOW DOWN! Study INDEPENDENTLY the full impact of this proposal, and give the communities MOST involved TIME TO RESPOND and to be convinced of its worth BEFORE it becomes an irreversible mistake!!

Respectfully submitted,

Hilda Enoch
