To: Marx, Joshua A NWK;
Subject: PLEASE - Reevaluate the permit with a full environmental impact statement
Date: Thursday, August 06, 2009 10:40:06 AM

Mr. Marx,

See my concerns below:

--No data was submitted for diesel plume emissions form the intermodal site, from dispersion by prevailing winds, or for deposit amounts on the nearby high school and middle school.

--No data submitted has been examined or verified by a neutral third party.

--All intermodal facility air emission data has been calculated with non-standard methods not those normally used for compliance with the National Environmental Policy Act

--Utility demands for the logistics park, to be built simultaneously with the intermodal, were not included in the submitted data for permitting

--Effects of traffic on the City of Gardner have not been submitted for permit review or public comment.

--A traffic review should include all data for the logistics park, which would be built at the same time as the intermodal and double the figure used for this permit.

Regards,

Cory Gordon
