Mr. Joshua Marx, Regulatory Manager
U.S. Army Corp of Engineers, Kansas City Regulatory Office
402 Federal Building
601 East 12th Street
Kansas City, MO 64106-2896

Mr Marx,
I am writing to you as a concerned citizen and business owner in Gardner, Kansas. As the start of the intermotal project closes in on this community the environmental impact has been brought to the forefront of our concerns.
It is being said you are posed to approve this project without an adequate environmental study, however I can assure you the citizens of this community and surrounding areas want YOUR full environmental assessment as it relates to this community. I have seen first hand the impact other intermodal's have inflicted on communities and they are anything but a "PARK".
I thank you in advance for your kind attention to this matter. I think you might be our last hope to prevent this disaster to our community.

Best Regards,
Connie D. Wright
