The impact the intermodol has on the Gardner area is especially important to me because I moved out here because of my health , the cleaner air. Please make sure or necessary precautions are taking in the development of the intermodol and the impact it will have on our area. I am already having breathing issues when I drive down any highway, why must I deal with this just walking out my door. Please be thoughtful and protect the people of Gardner and take proper care of our area. Barbara
