Mr Marx:

We are writing regarding a proposed BNSF Intermodal rail yard in Gardner Ks. Although we are not residents of Gardner, our children attend educational programs in Gardner, and we shop in the area. We also love Hillsdale Lake for its recreational opportunities and we are very alarmed to hear that the Corps is considering issuing a 404 permit, without first requiring a Full Environmental Impact Statement!

We believe that the proposed intermodal will harm &/or make this area less suitable for the uses that our family currently enjoys. Please require a full EIS to access all potential effects from the Intermodal & related activities that may impact air quality, water quality & any possible impacts from the increased

(over)

traffic - especially truck traffic with its exhaust.

Thanky you,

JoAnn Farb
