8-11-09

Dear Official

I was sickened when I recently learned about the BNSF's intermodel facility development without proper precautions. As a Johnson County resident who purposefully moved to a location near the trails + stream I was alarmed by the unanswered questions and poorly-researched models.

Please re-evaluate your stance on this matter and take acts that will result in further investigations into water + air quality for our residents

Thank you for your assistance on this matter.
