Subject: Proposed intermodal
Date: Sunday, August 02, 2009 8:09:33 PM

Due to severe arthritis I am unable to attend any public hearing on this matter, however, I do want to express my concerns and will do so now.

I want a full environmental impact study done on this project prior to it being built and prior to the project adversely affecting the health of thousands in this area. Your report said this study was not necessary, however, I fully disagree. I have done extensive research on intermodals across the U.S. and I find deadly pollution and billions in dollars for lost days of work and medicals costs that the people have to pay. I want that full environmental impact study done NOW.

Thank you.
