Mr. Marx, if you will remember I was at a meeting conducted at the Johnson County Parks and Recreation Barn location 199th Street several months ago where you and I discussed the impact the intermodal was going to have on our streams and wildlife. I express to you just how concerned I was at that meeting and later followed up my concerns with a letter. Now I understand your study does not even address on how it will effect me. Just the site itself. I as a taxpayer have a right to know all this information. If you remember I live just 1/4 mile (as the crow flies) from this site. Bull Creek runs thru my property and I receive a lot of run off water in my 3 acre pond. I want a full impact study! I deserve it! All Johnson County taxpayers deserve it. In my opinion you are not protecting our park which is just across the street from me, joins me on the west, and also joins me on the south. Did you study the impact on the wildlife when the bridge on 199th Street was being replaced? Ask me. I had more wildlife in my barn, in my front and back yards, and even the deer walked directly up my driveway. And I don't mean just a deer! I mean a lot. Public Works with Johnson County took a picture of all the tracks. They were so confused. You are messing with nature and for what! Big cooperation to make more money! Remember you have the power on our future FOREVER!Our children deserve to know they can visit our park drink our water and not be afraid of cancer or anything else that can harm them. You have the burden to protect them, please at least have a full study done. Thank you. Judy White, 33965 W. 199th Street, Edgerton, Kansas. 913-893-6857
