Dear Mr. Marx:

My understanding is that all data was submitted as an environmental assessment study only, as opposed to the full environmental impact statement which is required when federal funds are sought. A 50 million dollar TIGER fund is being sought from the federal government per the stimulus package for BNSF. I request that you do a full environmental impact statement, as required when you receive federal money (my tax dollars) and when federal projects have a significant environmental impact. The. scope and size of this project clearly calls for a full environmental impact statement. Please do the right thing.

Sincerely,

Lee C. Peters
