Approximately 0830 on 11-3-05 a disk shaped item about 16 inches in diameter was found that appears to be ordnance related. At first glance it resembled a base plate, however the metal is thin. It looks like it has a fuse well. Other thoughts are that it could be the top of a landmine or perhaps the top of a pressurized container. Evidence is not conclusive, but is still suspect. A 1" x 1" stake with pink flagging was placed at the sight the item was found and is marked "ADVENT 11-3-05". The sight is located at the Southeast shore of the lake.
