NOTICE OF AVAILABILITY

The U.S. Army Corps of Engineers, Kansas City District, has prepared a draft Master Plan for Pomme de Terre Lake with an Environmental Assessment and a Finding of No Significant Impact (FONSI) that are available for public review. These documents were prepared in accordance with the National Environmental Policy Act, and existing Corps policy and regulations.

Pomme de Terre Lake is a multi-purpose project located in Hickory and Polk Counties, Missouri. The prior Master Plan for the project was prepared in 1988. Since that time, recreational use patterns and populations of surrounding towns have changed. In addition, the regulations guiding master plans (EP 1130-2-500 dated June 2013) has also changed dictating the need to update the Pomme de Terre Lake Master Plan.

The Corps is soliciting public comments on the draft Master Plan, Environmental Assessment and FONSI during a 30-day review period that opens January 13, 2016, and will close February 12, 2016. These documents are available for review on the Corps' website at <http://www.nwk.usace.army.mil/Locations/DistrictLakes/PommedeTerreLake.aspx>. A public meeting will be held on January 27, 2016, from 3:00p.m. to 6:00p.m., to allow stakeholders to get additional information or submit comments on the draft report. Location of the meeting is the Pomme de Terre Visitor center located at the East end of the dam. The reports may also be obtained by contacting Mr. Curtis Hoagland, Environmental Resources Specialist, by telephone at (816) 389-3401 or by email at curtis.r.hoagland@usace.army.mil. All comments should be directed to the above address or email.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason Farmer".

Jason Farmer
Chief, Environmental Resources Section
