

September, 26, 2007

To: Kansas Department of Health & Environment.

As a citizen of Gardner, Kansas and the former vice president of the Gardner City Council, I demand that you do a full environmental impact study. The full study should include water; the watershed, wetlands, endangered species as well as air pollution; air particles, smog, etc.

Bull creek is the main tributary into Hillsdale Lake which provides water for Gardner, Edgerton, Spring Hill, Olathe, Louisbourg and 2/3 of rural Miami County.

Sincerely,

A handwritten signature in cursive script that reads "Mary B. Peters".

Mary B. Peters
Former Gardner City Council Vice-President

cc: US Army Corps of Engineers.
