Effect on local traffic of the Tuttle Creek spillway bridge repair contract

The U.S. Army, Corps of Engineers, Kansas City District, has authorized the replacement of a damaged expansion joint at the northern end of the Tuttle Creek Lake Spillway Bridge. To safely perform these repairs, it will be necessary to close one lane of K-13 starting September 3rd. One lane of traffic will be open for public use. Mobile traffic signals will be used to move north and south bound traffic through the work zone. The anticipated project duration is one month. The replacement of the damaged expansion joint will be performed by Centric Builders & Constructors, Inc. of Bedford, Texas.
