Kansas City District

Programs and Project Management Services

The Kansas City District executes programs and projects using the Project Management system. We are firmly committed to the concept of a strong single point of responsibility and authority to provide management and leadership to deliver projects that serve our nation.

Our Project Managers utilize the latest in planning tools including Microsoft Project and other database systems. We utilize innovative methods of project definition including planning, scoping and design charrettes. We integrate innovative engineering and design with the latest in best value acquisition methodologies to assure the most effective delivery of projects. We use risk based decision processes.

Our diverse expertise and experience in Program and Project Management includes military projects, vertical construction, training ranges, weapons systems beddown, aircraft facilities, transportation, hazardous, toxic and radioactive waste remediation, unexploded ordinance, hydrologic studies, flood control measures, levees, lakes and dams, non-structural flood prevention measures, recreation facilities and wildlife and biological studies.

Our mission is to serve the needs of the Nation.
