

Groundwater Sampling Locations

LEGEND

- USACE Extraction Well
- ⊕ Monitoring Well Cluster
- Approximate Area of TCE at a Concentration of 5 µg/L or Greater (2007)
- Approximate Area of RDX at a Concentration of 2 µg/L or Greater (2007)
- Approximate Area of Both TCE at a Concentration of 5 µg/L or Greater and RDX at a Concentration of 2 µg/L or Greater (2007)

Groundwater Sampling Locations - A subset of locations sampled

This table presents a results summary for a select set of wells. These wells are located **East to Southeast** of the groundwater contamination as depicted by the figure on the previous page and are listed from North to South. For additional information on concentrations of TCE and RDX for these wells and others at the site refer to the Interactive Spreadsheet or other data summary reports. The purpose of this table is to provide a specific summary of data only.

Monitoring Well ID	Initial Sample ¹	Most Recent Sample ²	Maximum TCE Concentration	# of samples for TCE ³	Maximum RDX Concentration	# of samples for RDX ³

¹ The Main Treatment Plant was given status of "operational" in February 2002. ""Initial Sample" is the first sample collected after this date. While additional data is available prior to this date, a comparison of data collected subsequent to full-scale operational status of the Main Treatment Plant is considered sufficient.

² "Most Recent Sample" is based on data collected up through 2nd Quarter sampling in 2008.

³ For the purpose of this comparison, field duplicates are not included in the number of samples but are considered as part of the determination of maximum concentration.

⁴ The "A", "B", and/or "D" listed with the Monitoring Well ID represent different general intervals/zones within the groundwater from which the sample is collected.

⁵ ND = Not Detected: means that the compound was not detected at the quantitation limit of the laboratory instrument.

⁶ N/A = Not applicable: means that either the location is not sampled for the compound or was only sampled for the compound prior to February 2002.
