

Turkey Creek Awareness Workshop

June 17, 2003

The future Turkey Creek will be different from what it is today, perhaps better, perhaps not, depending on the plans we're making now. Visiting the Awareness Workshop would be a convenient way to learn about the activities now underway by City, State, Federal and other types of organizations to gather information and turn it into useful plans for the future restoration and management of Turkey Creek.

Turkey Creek flows generally north and east from near 90th Street in Overland Park and follows the Interstate Highway 35 corridor until it enters a tunnel that takes it to the Kansas River. The water in Turkey Creek drains from the eastern part of Shawnee, the northwest corner of Overland Park, The northeast corner of Lenexa, all of Merriam, the southwest corner of Kansas City, Kansas, and small parts of Mission and Roeland Park.

Some of the activities now underway affect:

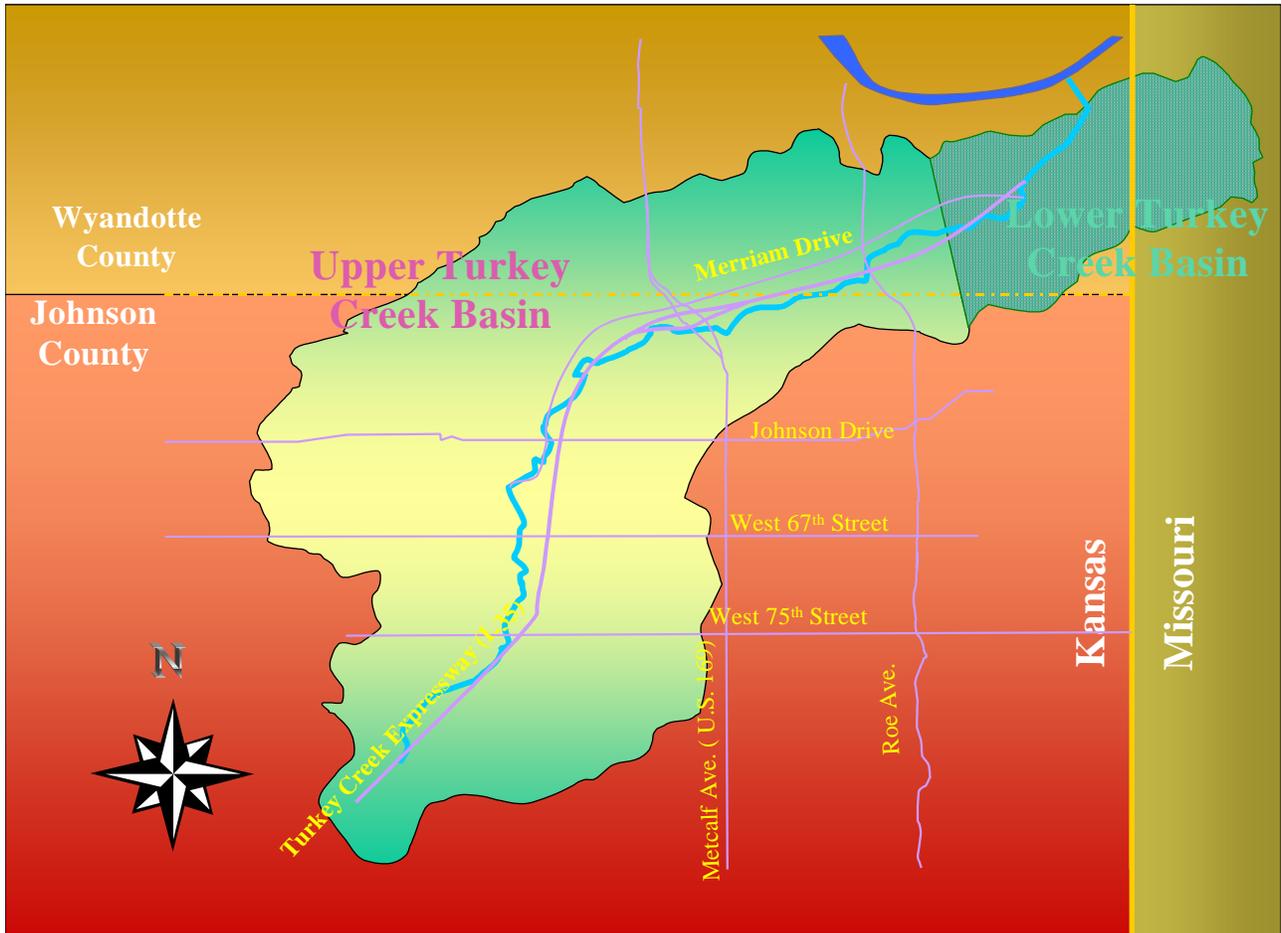

- ❑ Stormwater
- ❑ Wastewater
- ❑ Interstate Highway 35
- ❑ Recurring flood damage
- ❑ Natural habitat and resources
- ❑ Trails and parks
- ❑ Water Quality

The workshop will be open from 3 until 7 p.m. at the Antioch Public Library, 8700 West 63rd Street, Shawnee Mission, Kansas. A brief presentation will begin at 6 p.m.

You may direct questions or comments to Mike Wolfender, Project Manager, Kansas City District, Corps of Engineers, ATTN: PM-PF, 601 E. 12th Street, Kansas City, Missouri 64106-2896, phone (816) 983-3108 or e-mail michael.j.wolfender@usace.army.mil.
