

# Missouri River Waterways Analysis and Management System

The U.S. Coast Guard is conducting a Waterways Analysis and Management System (WAMS) study of the Missouri River from the confluence of the Mississippi River (Mile 0.0) to Mile 732.3 in the vicinity of Sioux City, IA. The study focuses on the area's aids to navigation system, waterborne commerce, marine casualty information, port/harbor resources, emergency response plans, routine and emergency communication capabilities, and future development projects. Any interested company or individual wishing to provide comments or participate in a user survey should by **September 28, 2021**. The survey is available at:

<https://forms.gle/Y5Mm2iKWq7AJsvx7A>

**Sector Upper Mississippi River will host a Virtual Public Meeting to receive input from all river users on August 26, 2021 at 9:30 a.m. (see below for meeting link).**
